## Experience

○ **Fev 2022- Present**

123milhas

### Senior Product Manager

I was responsible for leading the company's loyalty program. This project was launched in July 2022. In August 2022 I took over the company's financial products teams, helping to improve the system and increase the number of gateways and APIs integrated into the system.

○ **2020 - 2021**

Addhere Technologies

### Head of Product

Healthcare startup that developed a system that helps diagnose children with ADHD. The system was developed from scratch, and uses artificial intelligence and blockchain technologies.

Addhere received government investment and also from private funds. Won innovation awards in Brazil and the United Kingdom.

○ **2018 - 2023**

Faculdade Arnaldo | ESA - OAB | XPeducação (IGTI)

### Professor

I worked as a university professor in postgraduate courses in Law and Technology at Faculdade Arnaldo and at Escola Superior de Advocacia da OAB. I also worked as a teacher on the MBA course in Blockchain at XPeducação (IGTI).

I taught classes on introduction to programming, decentralized systems architecture, DApp development and blockchain.

○ **2019**

Resolva Rápido

### Senior Project Manager

Startup in the legal area whose main product is a legal document automation system and scalable service flow.

I worked on project management, hiring the team, specifying requirements and delivering the product.

○ **2008 - 2018**

SSX Digital

### Project/Product Manager

SSX Digital is a software house. In this company I worked as Project Manager and Product Manager on more than 80 projects over 10 years. I worked with teams of 5 to 6 people and also managed multiple teams totaling 35 people.

The projects ranged from web portals, mobile applications, CRM systems, ERP systems and many other projects in the area of software and technologies.
